

iRemoval Pro Premium V3.1.1 Guide For All User

Always Download Tool Fresh and Delete Old (To Make Sure You Use Latest Tool)

Preparing Your Equipments:

- Proper USB Cable
- Proper Fast Internet Connection (WiFi Only)
 - Don't Use HotSpot From Devices
 - iPhone To Be Charged Minimum 40%
 - Windows PC With Minimum Windows 10

• Make Sure You Restore (Quick Flash) the iPhone on iOS 17.7 or 18.0.1 (Only 17.7 or 18.0.1) and then

Dont Connect WiFi On iPhone

Preparing Your Pc / Computer

• Disable Test Mode On windows if enabled

Follow This Guide:

(Click The Link Below)

https://www.dell.com/support/kbdoc/en-us/000190354/removing-the-test-mode-watermarkfrom-the-windows-10-desktop

• Disable Driver signature enforcement

Follow the guide below

https://www.prajwaldesai.com/disable-driver-signature-enforcement-in-windows-11/

- If CMD Says "The Value is protected by secure boot policy" then you must disable secure boot from BIOS Menu. This can be done by googling you brand and BIOS Setting. Then repeat to disable driver signature enforcement.
 - Preparing Your PC Drivers

Uninstall iTunes From 3uTools Toolbox

Restart PC

Install iTunes From 3uTools Toolbox

Restart PC

Then Open Repair Drivers in iTunes Utility inside Toolbox of 3uTools

Advanced Repair > Close Firewall > Uninstall Old Drivers
